- Fire TV Stick Lite 2nd Generation 2023

Identify which Fire TV you have - amazon.com/help?id=201640900

If you are setting up your Fire TV for the first time...

All you need is:

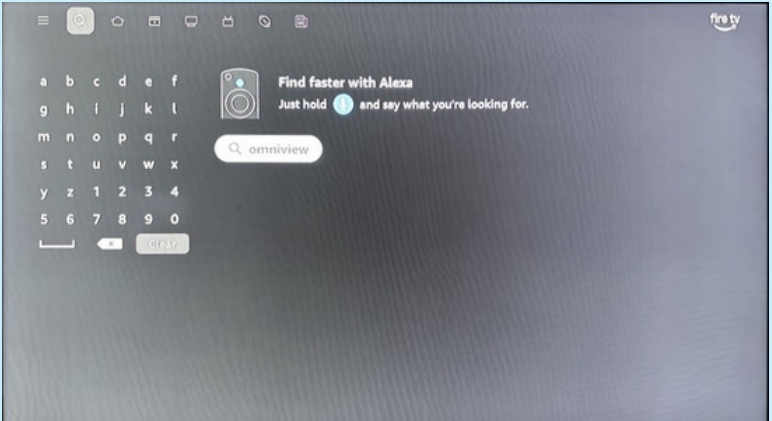

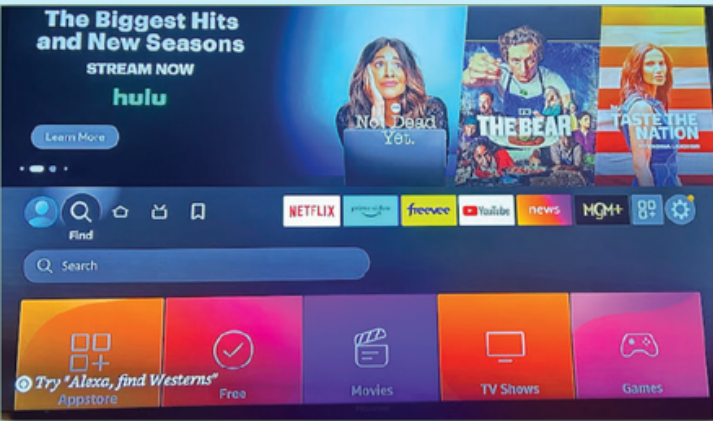

- An Internet connection
- An Amazon account. If you don't have an Amazon account, you can sign up here for free amazon.com/sign-up
- A TV or other display with an HDMI port
- An HDMI cable (on 4K capable devices, you need an HDMI 2.0 or later compatible cable).

Start with these quick steps:

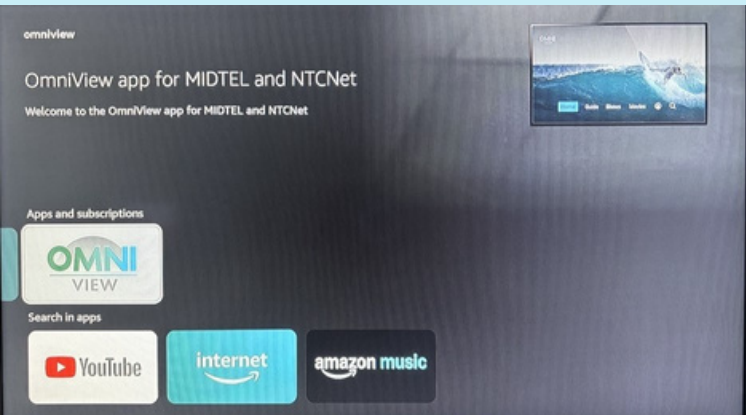

1. Plug the power adapter into an electric outlet and the Fire TV device into your TV's HDMI port.
2. Use the USB cable to connect the power adapter and the Fire TV device.
3. Install the batteries in the remote by matching them to the icons inside. If the remote doesn't automatically pair with your Fire TV, press and hold the Home button for 10 seconds.
4. Use the Source button on your TV remote to locate the HDMI signal for your Fire TV device.

Install OMNIVIEW on your Fire TV

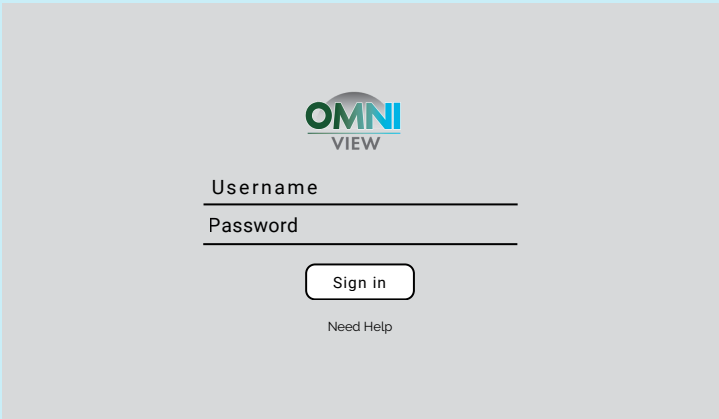

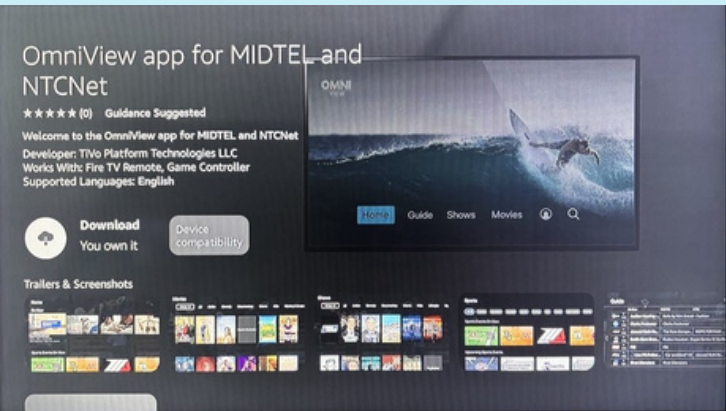

Now that your Fire TV is all set up, select the search icon to the left of “Home” at the top of the screen and search for “OMNIVIEW.”

Scroll down to Apps & Subscriptions, highlight and select OMNIVIEW.

Select the download button to begin downloading. Once it's done downloading, select Open to launch and put in your account Username and Password.

Make sure you are connected to your MIDTEL provided internet.
OMNIVIEW needs to be connected to the internet provided to your home by MIDTEL in order to access your entire streaming line-up.
